*Invites you...*

The rail smoother is a rail-borne vehicle which reduces noise and ensures a more comfortable ride by removing irregularities from rails. This project is part of CTA's \$122 million Capital Renewal Program which is being funded by the federal Urban Mass Transportation Administration, the Illinois Department of Transportation and CTA.

to the debut  
of its new rail smoother,  
one of the most effective noise control devices  
in rapid transit history,
